

## PRODUCT INFORMATION SHEET

### Rotary Vice

#### Product description

Rotary locksmith's vice designed for clamping objects manually or mechanically processed. Used for repair, overhaul and construction work. A robust, cast iron structure with an anvil and hardened thread enables the use of the vice during heavy duty work.

#### Charakteristics

- coated with baked anti-corrosive paint;
- adjustable, rotary base enables to change the angle in the horizontal plane by 360 degrees and to place the workpiece in the most comfortable operating position;
- steel, hardened jaws with cross cuttings;
- strong, durable ductile iron body (graphite inclusions);
- base mounted with two bolts; chrome-plated steel structural elements;
- knob equipped with safety ends.
