

PRODUCT INFORMATION SHEET

L-shaped Magnetic Welding Holder

Product description

A set of two L-shaped welding magnetic holders to support metal sheets, pipes and rods being welded. Holders are also used for soldering, marking out, lifting of steel elements and during various assembly works.

Charakteristics

- body made of thick steel sheet;
- strong ferrite magnets provide a strong attraction force and a fixed position of the material to be processed;
- strong rivets guarantee the stability of the holder structure;
- a special shape and strong magnets allow precise positioning of workpieces at an angle of 60°, 90°, 120°;
- they allow objects to be connected at a 90° angle with magnets located on the outside, which allows easy access to the weld while welding;
- the set includes 2 magnets with a lifting capacity of 9 kg each.
