

FULDE safety shoes LACE SYSTEM S3S SR FO ESD grey/blue 45

Opis Produktu

Men's safety shoes conforming to class **S3S** according to **EN ISO 20345** are marked **ESD** for use in EPA (electrostatic discharge protected) areas. Electrostatic effect protection in accordance with **EN 61340** enables electrostatic charges to be discharged safely, preventing damage to sensitive components. The high quality workmanship of the footwear promotes comfort and convenience. The model is equipped with the **LACE SYSTEM** enabling quick and easy adjustment of the binding and a precise and even fit of the boot. The composite toe cap protects the toes from falling objects. Thanks to its non-slip sole, the footwear is perfect for walking on uneven and slippery surfaces. The boots are dedicated to the logistics industry, transport, in the automotive industry, in repair work. They are excellent for use in enclosed spaces (e.g. halls).

Charakterystyka

- Upper material: nubuck leather;
