

Rotary hammer drill 18V + 2Ah battery

Product description

Compact and efficient device for drilling in walls, ceramics, stone, wood and metal, especially recommended for difficult work in the ceiling. The pneumatic impact drive mechanism with a force of 1.5 J at an impact frequency of 0–5100 IPM and a rotational speed of 0–910 RPM allows for faster and effective drilling, especially in walls. SDS+ handle enables rapid and comfortable drill bit exchange, without the need to use additional tools. Gearbox made of metal enhances the wear resistance and ensures precision of the mechanism. Smooth adjustment of the rotational speed in the power switch provides full control over the conducted operation. Soft handle enables more reassuring hold of the power tool and dampens vibrations during operation. The built-in, powerful LED torch perfectly illuminates the work area. Changing the rotation of the power tool in both directions enable drilling, and unscrewing. OneAccuSystem 18 V enables using the selected battery in a wide and diverse range of power tools for the most heavy-duty work.

Characteristics

- Function selection: non-impact drilling, impact drilling.
- Handle – SDS+.
- Energy 1,5 J.
- Rotational speed: 0–910 RPM.
- Impact Rate: 0–5100 IPM.
- Maximum wood drilling diameter – 25 mm.
- Maximum steel drilling diameter – 10 mm.
- Maximum concrete drilling diameter – 12 mm.
- Metal gearbox mechanism.
- LED light.
- Smooth speed adjustment in the power switch.
- Soft handle.
- Right and left rotation direction switch.
- Weight – 1.35 kg.
- The rechargeable battery to be purchased separately.
- EAN code – 5902801441431.
- 3 years warranty (after the tool is registered).
- OneAccuSystem.
- Voltage – 18 V.
