

Worklight

Product description

Compact LED spotlight with two different light sources with swivel handle.

The SMD source is suitable for more spot lighting of a specific object with a focused beam of light.

The COB source emits a wide, diffuse light without shadows, suitable for illuminating larger areas.

The nominal light output of 250 lm can be increased by the 'BOOSTER' function to 500 lm.

The device has 5 modes of operation:

1. SMD.
2. COB weak.
3. COB strong.
4. BOOSTER.
5. Red continuous for rapid detection of fluid leakage.

The device has IPX2 waterproofing, i.e. protection against water dripping from various directions at an angle of up to 15 degrees.

In addition, the mechanical resistance class IK07, protects the object in question from damage if a weight of 0.5 kg is dropped on it from a height of 40 cm.

A strong magnet allows it to be mounted on any metal surface, freeing up your hands for work.

Thanks to the specially shaped hook, the spotlight can be hung horizontally on the edges of objects.

The rotating arm allows the suspended light source to be flexibly directed to the object in question.

The built-in 3.7 V, 350 mAh battery provides the spotlight with a long burn time, up to a maximum of 10 hours.

The torch is conveniently rechargeable, with a universal USB-C cable that can be connected to a laptop, charger or phone, for example.

The LED indicator shows the state of charge of the battery.

Characteristics

- Light modes/light output/operation time/beam length/light angle:

1. SMD/ 100 lm/ 5 h.
2. COB weak/ 100 lm/ 5 h.
3. COB powerful/ 250 lm/ 1.5 h.
4. BOOSTER/ 500 lm/ 30 s.
5. Red/ - / 10 h.

- SMD and COB light colours: 5000-6500 K.
- Battery capacity: 3.7 V, 350 mAh.
- Charging time: 3 h
- Charging: USB-C cable, included in the kit.
